Subject: Letter of Consent: Environmental Impact Assessment, Ariamsvlei Settlement, Development of Two Above-Ground Fuel Supply Tanks with a maximum Capacity of 286 000 Litres and One Fuel Storage Tank with a maximum Capacity of 500 000 litres:

The forgoing cited topic has reference.

The Karasburg East Constituency welcomes the proposed project as it speaks to the developmental agenda of our Constituency in terms of Community upliftment. Furthermore, with our high unemployment rate, the project comes at the right time to tackle this social challenge.

During numerous engagements with developmental committee members and Stakeholders, there were not any objection/s against the proposed development at Ariamsvlei Settlement. The fauna and flora will not be a thread by implementing the envisaged project. The notice of the proposed development was placed and circulated within the Constituency and to date no objection was received.

It is trust that the forgoing suits you and we are looking forward for the commencement of the envisaged project.

Yours Faithfully,

Honourable Anseline Beukes

Regional Council:

Karasburg East Constituency
