Hi Team,

We had a meeting with MTC, and the following key points were discussed:

- MTC tower projects will now focus solely on the **construction phase**. The **operation and maintenance phase** will no longer be included. Project titles should now follow the format: *"The construction of ..... tower at Erf ....."*
- There is **no longer a need to submit reports to the Radiation Authority**.
- MTC had a joint meeting with **MEFT, CRAN, and NRPA**, where it was noted that there is a **duplication of requirements** between CRAN and the Radiation Authority.
- MTC will **engage MEFT via a formal letter to the Environmental Commissioner**, explaining the rationale for issuing ECCs **without NRPA radiation consent**.
- Going forward, MTC will obtain **exemption letters from CRAN** regarding radiation requirements, and they will share with the consultants.

For the projects already submitted, we will **proceed with the current titles** for now.

Kind regards,
