Mineral License/Rights Hoarding Will Not Be Allowed- Ithete

Nghiinomenwa-vali Hangala and Patemaoshela Lukolo

he government has informed foreign and The government has informed to one local investors interested in the exploration and mining or speculators that it will no longer tolerate the hoarding of licences for purposes unrelated to national development.

The country's Deputy Prime Minister, who also doubles as Minister of Industries, Mines and Energy, Natangue Ithete, stated this during the opening session of the 2025 Mining Expo. He also indicated that his Ministry has already issued notices to non-compliant mineral rights holders and will soon engage them.

The Deputy Prime Minister indicated that there are several licences issued where no activity has commenced.

"This must change, because the mineral rights are granted with the intention of production," he

Ithete indicated that Namibia's minerals are a national asset.

"They are our hope for social progression and improved livelihood. It is therefore our collective responsibility to ensure that the exploitation of these resources results in tangible benefits for all Namibians," he said.

Ithete also promised that under his leadership at the Mining Ministry, they will prioritise policy frameworks that strengthen local ownership, build capacity, and promote value addition.

While updating that the Ministry is currently reviewing the Minerals Bill and will soon commence stakeholder consultations, especially in key regions where exploration and mining are taking place.

laws are fit-for-purpose and reflect the ambitions of an equitable and modern mining industry," the DP stated.

Furthermore, the government is also consulting with industry stakeholders on mechanisms that will promote 51% Namibian ownership in new mining ventures.

"We believe that local empowerment is not only a matter of social justice, but also a cornerstone for long-term stability and sustainability in the sector," Ithete stated.

He warned that mining must not become an elite-driven activity disconnected from ordinary Namibians.

"Let us mine not only for profit, but for our people," he urged. "Our minerals must uplift lives, not just in boardrooms, but in the most remote areas of our country."

Namibia's 12th Mining Expo and Conference opened on 5 August at the Windhoek Showgrounds with strong calls for a mining sector that not only drives economic growth, but also delivers real benefits to all Namibians.

The event has also been extended to three full days for the first time, reflecting its growing role in shaping national mining policy and investment direction.

In a keynote speech delivered on behalf of President Netumbo Nandi-Ndaitwah, Carlo Lord Muhamed McLeod, Special Advisor in the Presidency, commended the mining sector's evolving role as a partner in inclusive development.

He revealed that in 2024, the industry contributed N\$52.3 billion in revenue, created over 9,400 permanent jobs, 97% of them held by Namibians, and spent N\$23.94 billion on local procure-

"Namibia's mining sector is not only thriving, it is evolving into a more inclusive, innovative, and forward-looking industry," McLeod said.

"Let us work together to unlock the full potential of our mineral wealth, not just for today, but for generations to come."

George Botshiwe, President of the Chamber of Mines of Namibia, opened the Expo by highlighting the sector's resilience despite global challenges such as falling diamond prices and rising competition from lab-grown alterna-

Although the industry recorded a 1.2% contraction in 2024, it maintained a strong 13.3% contribution to GDP.

"The achievements of this sector reflect its alignment with national goals, particularly under NDP6, which prioritises industrialisation, inclusivity, and sustainable growth," Botshiwe

He also stressed that while direct employment numbers in mining may be modest, the sector supports thousands more jobs indirectly through its local procurement.

In 2024, mining companies spent nearly half of their total revenue, 46.2% on Namibian goods and services.

"Beyond ownership in mining operations, the greatest opportunity for Namibians lies in en-trepreneurship within the supply chain," he added, pointing to tools like the Database of Mining Inputs and Services, launched at the 2024 Expo, as enablers of local participation.

The Chamber also reaffirmed its commitment to inclusivity by providing free public access to the Expo and allocating complimentary booths to institutions such as UNAM, NUST, and various industry associations, including Women in Mining Namibia.

Investor interest remains high. Namibia was ranked the fourth most attractive African destination for mining investment in the latest Fraser Institute Survey.

Major uranium and gold projects such as Bannerman Energy's Etango-8, Deep Yel-low's Tumas, and Osino Resources' Twin Hills are moving toward development, further strengthening Namibia's role in global resource markets.

Rundu Tourism Minimally Promoted

Annakleta Haikera

Various entrepreneurs in Kavango East have raised concerns over the lack of facilities to support tourism, saying the situation is limiting opportunities for economic growth and diversification.

This came to light during a visit by the Parliamentary Standing Committee on Natural Resources on Wednesday.

Local farmers said Rundu has no designated facilities to attract tourists.

The tourism sector which comprises local and foreign tourists alike is one of the few sectors which also feeds other industries.

Town such as those in the coastal areas continue to invest in their local attractions to attract visitors. Similarly, Windhoek also prioritises toursism as a key sector to promote.

The entrepreneurs also voiced that there is an absence of an aquaculture office in the region. This, they say, is a big oversight, as fish farmers lack guidance on how to effectively tap into the industry

The building intended to cater for fish farmers has stood abandoned for about 13 years since construction began.

According to the Ministry of Agriculture, Fisheries, Water and Land Reform, the N\$16 million infrastructure project started in 2012.

It is reported that the initial contractor was replaced for failing to adhere to the original scope, and African Silver Engineering was later appointed to complete the work in 2018.

However, progress stalled due to payment
issues, leaving the building deserted ever since.

The parliamentary standing committee chairperson, Tobie Aupindi, acknowledged the
concerns, stressing the urgent need to re-

Rudolph Haingura, one of the farmers, noted that despite the region's proximity to rivers, many farmers have yet to explore fish farming. He said this was a missed opportunity to diversify agricultural activities and improve household incomes.

"With the right training, resources, and support from authorities, farmers could tap into aquaculture," he suggested.

"This would not only improve food security, but also create jobs, especially during droughts or seasonal drops in crop production," Haingura added.

Another farmer, Johannes Ipinge Murenga, shared his personal experience of building a fish pond at home, which proved highly successful

He expressed frustration that while authorities are quick to arrest those fishing illegally, they have failed to provide training or support for fish farming.

Furthermore, farmers in conservancy areas revealed there are no structured plans for trophy hunting, another potential revenue stream that could boost tourism and benefit local communities.

The parliamentary standing committee chairperson, Tobie Aupindi, acknowledged the concerns, stressing the urgent need to rehabilitate the abandoned facility, launch fish farming initiatives, and develop strategies to promote both tourism and sustainable fisheries in Rundu.

CALL FOR REGISTARTION AS INTERESTED & AFFECTED PARTIES

ENVIRONMENTAL ASSESSMENT FOR THE PROPOSED PROSPECTING IN RESPECT TO PRECIOUS METALS, BASE AND RARE METALS, INDUSTRIAL MINERALS AND DIMENSION STONES ON EPL 9437, ERONGO REGION

1. PROJECT SITE AND DESCRIPTION

Penetrated Investment or (the Proponent), Intends to apply to obtain an Environmental Clearance Certificate for their proposed prospecting activities in respect to Precious Metals, Base and Rare Metals, Industrial Minerals, and Dimension Stones on a combined area of approximately 947.86 Ha in the Erongo Region. The key component of the proposed activity entals geological mapping and survey and manual sample collection for laboratory analysis, and small-scale mining operation. Access to the sampling or survey sites will be by existing tracks and on foot where vehicle access is limited.

2. PUBLIC PARTICIPATION PROCESS

Enviro-Leap Consulting invites all Interested and Affected Party (I & AP) to register and receive Environmental Assessment (BID, Scoping and EMP) documents relating to the proposed project for their comments and input. Interested and Affected Parties are herewith request to register by writing to us at the address below no later than O4 September 2025.

3. COMMENTS AND QUERIES

Please register and direct all comments, queries to: Mr. Lawrence Tjatindi, Environmental Assessment Practitioner Email: eap.trigen@gmail.com

APPENDIX B - 2 PUBLIC CONSULTATIONS - COMMENTS AND RESPONSES

COMMENTS AND RESPONSES

ENVIRONMENTAL SCOPING PROCESS PROSPECTING ACTIVITIES ON EPL 9415 IN THE KARASBURG CONSTITUENCY – WEST OF KARASBURG TOWN, ||KARAS REGION

September 2025

This Report would reflects the comments and recommendations raised during the public consultation process, whether through expression of interest and virtual communications received on email. However, no specific registration of Interested and Affect Parties, nor comment were received from any.
