

## **Summary of Stakeholder Feedback**

All Interested and Affected Parties (I&APs) registered in terms of Regulation 22 of the Environmental Management Act (2007) were duly consulted during the EIA process for the proposed harvesting of dead olive trees on Farm Tiberian. Feedback received from stakeholders, including local representatives, neighbouring landowners, and community members, indicated broad support for the project. No objections were raised by any of the I&APs, and the project was generally welcomed as a sustainable intervention with socio-economic and environmental benefits.
