# **1. STATUTORY REQUIREMENTS**

# 1.1 EIA Regulations

Section 21 of the EIA regulation outlines the Public Participation Process (PPP). PPP is an important process, because it gives members of the public and Interested and Affected Parties (I&APs), an opportunity to comment or raise concerns that may affect the socio-economic or general environment because of the project.

# 1.2 Newspaper Adverts

Section 21 (c) stipulates that ECC applications should be advertised once a week for two consecutive weeks in two newspapers that are widely circulated in Namibia.

The ECC application was advertised in the Namibian and New Era Newspapers (Appendix 1-4).

Section 21 (c), stipulates that ECC applications should be advertised once a week

for two consecutive weeks in two newspapers that are widely circulated in Namibia.

Adverts were placed in the newspapers as follows:

- 1st Advert The Namibian: 7<sup>th</sup> March 2025
- 2nd Advert The Namibian: 13<sup>th</sup> March 2025
- 1st Advert New Era: 7<sup>th</sup> March 2025
- 2nd Advert New Era: 13<sup>th</sup> March 2025

# 1.3 Consultation meetings

Tortoise Environment Consultants (TEC) did a power presentation outlining the following (Presentation attached – *Appendix 6*):

- a) Project scope proposed construction of the road
- b) EIA framework and ECC application process
- c) Environmental and Social aspects to be assessed
- d) National socio-economic benefits
- e) Envisaged community benefits

# **1.3.1** Authority Consultation

Consultations were done with the Oshikoto Regional Council during the EIA field assessment exercise on the 14<sup>th</sup> March 2025, through which due information and documentation were provided to the Environmental Assessment Practitioner (EAP).

# 1.3.2 Public Meetings

Section 21 (5,6) requires that public meeting/s should be held near the project site to inform the public about the project and subsequent submission of the ECC application to the Environmental Commissioner.

Type meet		Date	Venue
1 <sup>st</sup>	Public	14 <sup>th</sup> March 2025	Onyaanya Constituency Office

#### Newspaper advert 3 – New Era

Friday 7 March 2025 | NEW ERA

# Humanwildlife conflict clashes increase

#### Rudolf Gaiseb

he loss of lives due to human-The loss of lives due to human-wildlife conflict (HWC) is increasing at an alarming rate, with the Zambezi region the worst affected, says a recent report by Namibia's parliamentary standing committee on natural resources.

According to the report, this is is because the region is situated in the middle of the Kavango, Zambezi Trans-Frontier Conservation Area (KAZA-TFCA), the second largest nature and landscape conservation area, replete with a large elephant population

population. Other regions affected by the crisis are Erongo and Kunene, where cases of human-wildlife conflict happen

almost every day. The committee noted that an intervention from the government is required as a matter of urgency to address the situation. The report was compiled between August 2023 and August 2024 and comes as a response to a motion tabled in Parliament by deputy health and social services minister, Ester Muinjangue, in 2023.

The Zambezi region has 15 conservancies and one association, as

Trample... The loss of lives due to human-wildlife conflict is increasing at an alarming rate with the Zambezi region the w orst affected . Photo: Festus Hamalw

well as three national parks - Bwabwata, Bamunu, and KAZA-TFCA - which are home to 400 animal species. The residents of Sangwali area in

Judea Lyabboloma constituency of Zambezi region described the national parks in their areas as both a blessing and a curse, because they continue suffering heavy losses from incidences of human wildlife conflict due to their proximity.

Sangwali area borders Nkasa Rupara and Mudumu national parks to the east and to the west respectively. "In 2020, there were 139 cases, of

<sup>Th</sup> 2020, there were 139 cases, of which 109 were crop field damage, 29 livestock attacks, and one human attack. In 2021, the total number of cases rose to 201 with 193 crop field damage and eight incidences of livestock attacks. In 2022, a total of 188 cases were recorded, 180 of them crop fields damage while eight

were livestock attacks. From alone, more than 180 cases were recorded involving damage to crop fields, livestock attacks and even loss of human lives," the report added. Besides the Zambezi region,

people in Kavango East and West, Kunene, and Erongo compete for water and crops with animals due to the severe drought the country

"Wildlife is one of the remaining assets of the natural

world with considerable potential to benefit rural communities. However, one of the greatest threats to this wildlife, particularly the more iconic species such as elephants, crocodiles, and lions, arises from HWC, through retaliation for loss of livestock to predators, crop damage by elephants, and loss of human life or injury. It is unfortunate that both wildlife and human beings find it difficult to coexist, resulting in HWC," the report states.

#### 5 NEWS

"The communities out there are devastated by the loss of domestic animals to predators, loss of life as a result of crocodile attacks, and crop damage, including destruction of infrastructure by wild animals, especially elephants," the report adds.

Zambezi governor Lawrence Alufea Sampofu told the committee the human-wildlife conflict occurs due to the sharing of water points. "Communities dependent

on the [Zambezi] river and

on the [Zambezi] river and resources along the river bring them into conflict with wild animals," he said. According to the committee, chief regional officer Reginah NdopuLubinda, said the regional council has been exploring ways to restore the region to its ways to restore the region to its former glory as the breadbasket of Namibia by considering other alternatives to wildlife

conservation. This includes reducing the size of conservancies to allow communities to farm and produce enough food for their livelihood.

"The Zambezi region has quite anumber of conservancies, which cannot cater to all communities, hence the need for exploring other nencontenteneoutrexploring other means of survival, agriculture in particular. The region needs to strike a balance to ensure people do not go hungry while protecting wildlife animals." *-rrgaiseb@gmail.com*

# **Global firms target Malawi's US\$30 billion mineral boom**

APE TOWN - Malawi could generate up to US\$30 billion (almost NS550 billion) from mineral exports between 2026 and 2040, with annual revenues expected to hit US\$3 billion by 2034, according to the World Bank. The financial institution projects the sector to account for 12% of the country's GDP by 2027, driven by new projects and the expansion of existing production initiatives.

As prospects within Malawi's mining industry continue to grow, the upcoming African Mining Week in Cape Town will serve as a key platform to connect Malawian stakeholders, regulators and global investors, driving investment inflows and fostering strategic collaborations to accelerate sectoral development. Malawi has recorded several industry growth milestones in 2025, with global

Malawi has recorded several industry growth milestones in 2025, with global partners expediting exploration and production projects in line with the country's Agriculture, Tourism and Mining Strategy, designed to attract new investments for economic growth. Last month, Australian company Lotus Resources secured US\$38.5 million in funding from South African banks First Capital Bank and Standard Bank for its Kayelekera Uranium Project.

Kayelekera Uranium Project. This financing injection not only supports operational readiness, but also enhances Malawi's positioning as a competitive uranium producer amid rising global demand. With the funds providing working capital and supporting the firm's equipment procurement, the development marks a huge milestone for the project, ahead of a planned 03, 2025 first production to treat

Q3 2025 first production target. Sovereign Metals, supported by Rio Tinto, is fast-tracking the Kasiya Rutile-Graphite

Project, home to the world's largest known rutile resource and the second-largest flake graphite reserve. A February 2025 test conducted by the firm confirmed the mine's suitability for refractory applications, while a January 2025 feasibility study projected US\$16.4 billion in revenue potential.

As global markets increasingly seek sustainable sources of high-quality rutile and a privotal supplier, meeting rising industrial and green energy needs. With US\$665 million allocated for project development, Kasiyais expected to become a major revenue generator for Malawi. In the rare earths/ sector, Australia's

graphite, Kasiya is well-positioned to become

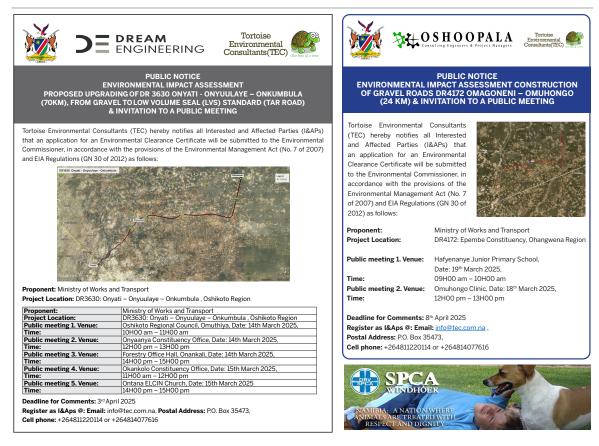

In the rare earths/ sector, Australia's Lindian Resources is seeking to attract new investment partners for its Kangankunde Rare Earths Project. The company recently awarded a US\$1.3 million contract to Mota-Engil to develop infrastructure and carry out civil works, advancing project timelines. With rare earth elements playing a crucial role in high-tech industrise, clean energy and defence applications, this project strengthens Malawi's position in the global supply chain. In January 2025, Kula Gold and African Rare Metals established a joint venture (JV)

In January 2025, Kula Gold and African Rare Metals established a joint venture (JV) for the Wozi Niobium Project to accelerate project development through expertise and shared capital. The JV has applied for an exploration

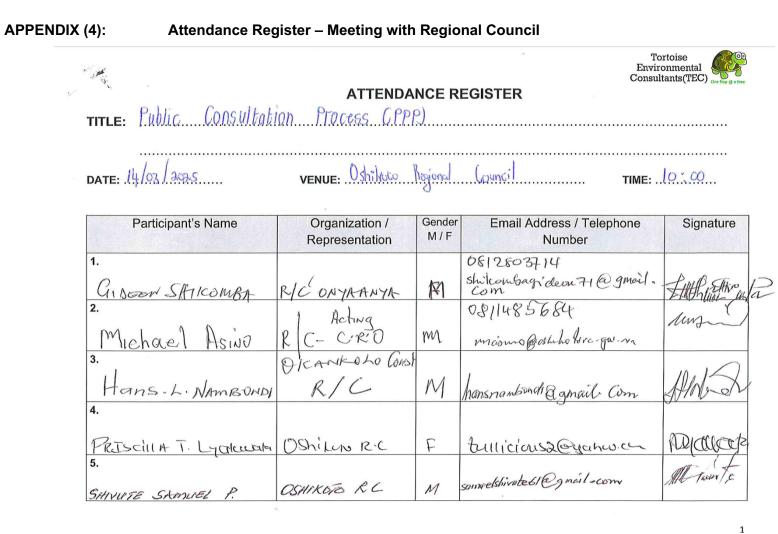

The JV has applied for an exploration licence, with plans for fieldwork, sampling and a US\$100,000 drilling program beginning in Q2 2025. Given growing demand for niobium for steel production, the project is poised to generate substantial foreign exchange earnings for Malawi. Amid these developments, African Mining Week will provide a platform fordeal-making and partnerships, connecting Malawi's mining sector with global investors and showcasing the country's growing potential as a hub for critical minerals. With an increasing focus on securing reliable mineral sumpling for the anerry

With an increasing focus on securing reliable mineral supplies for the energy transition, Malawi's rich deposits of uranium, graphite, niobium and rare earths present a unique opportunity for international stakeholders seeking long-term, stable partnerships. African Mining Week serves as a premier

African Mining Week serves as a premier platform for exploring the full spectrum of mining opportunities across Africa. The event is held alongside the African Energyes Week: Invest in African Energies 2025 conference from 1 to 3 October in Cape Town. – APO Group

APPENDIX (6): Presentation

### **ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT** (ESIA)

### **PUBLIC CONSULTATION PROCESS (PPP)**

### PROPOSED UPGRADING OF THE ROAD – DR 3630 ONYATI – ONKUMBULA (70KM), FROM GRAVEL TO TAR ROAD (LOW VOLUME SEAL – LVS)

### **OSHIKOTO REGION**

## **Presentation Outline**

- 1) Stakeholder engagement Objective
- 2) Legal Requirements
- 3) ESIA Objectives
- 4) ESIA Process
- 5) Project Description
- 6) Key Environmental & Social Issues
- 7) Questions / Comments

# **Stakeholder Engagement Objectives**

- Provide a brief description of the proposed
   Development (road construction)
- Highlight Key Environmental and Social issues
   associated with the proposed road construction
- Obtain inputs / comments from stakeholders
- Outline the ESIA Process way forward

# Legal Framework

- The Environmental Management Act (Act No. 7 of 2007) and ESIA Regulations of 2012, prescribes Listed activities
- Listed activities, are activities that may not be conducted without an Environmental Clearance Certificate (ECC)
- Road Construction is a listed Activity, thus an ECC is requirement
- Therefore, Tortoise Environmental Consultants (TEC) has been appointed to undertake the ESIA process and apply for the ECC from the Environmental Commissioner

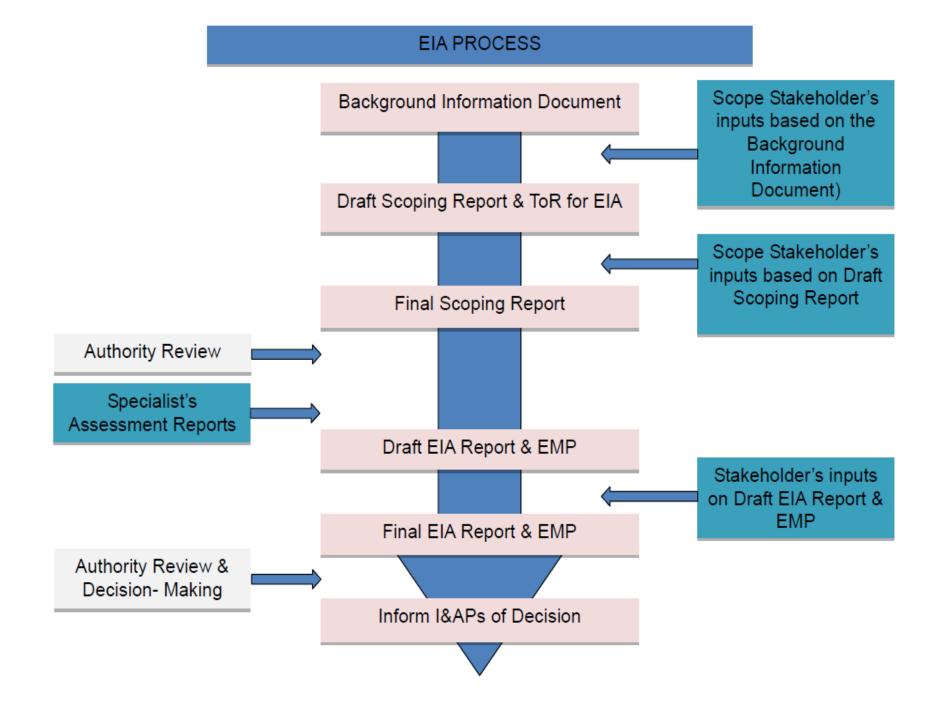

### **ESIA Objectives**

 To identify potential environmental and social impacts

 To offer the **public** an opportunity to **comment** on the proposed activity

• Document all issues of concern

 Identify and recommend measures to mitigate (avoid / minimise) negative impacts & maximise positive impacts

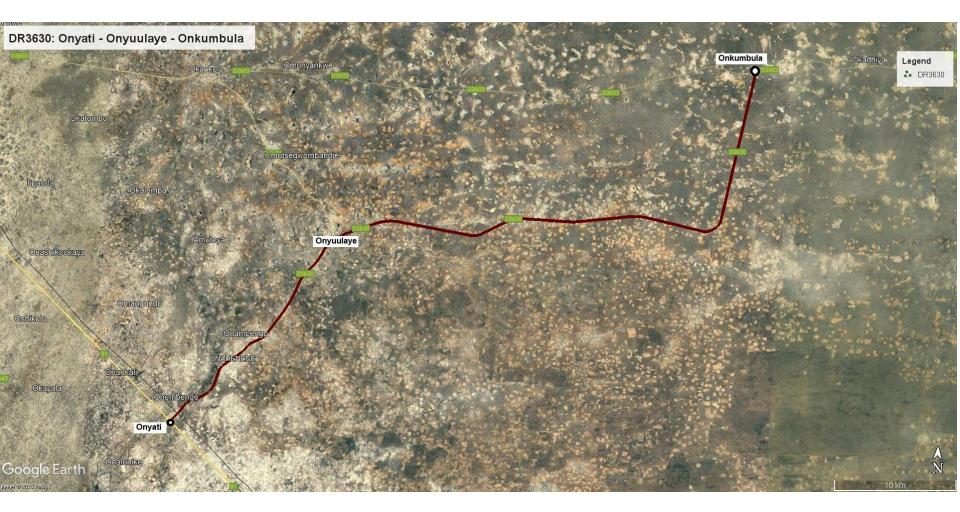

# **Need for road construction**

- The road is of high priority in the Road Master Plan for Oshikoto Region.
- Community members from Onyaanya, Okankolo & Eengodi constituencies are unable to access school, clinics, markets and hospitals during rainy season.
- Improve connectivity and access to services (Hospitals, schools, supermarkets, church, etc)

Figure 1 & 2 : Beginning of DR 3654 @Onyati

# **Project Location**

# Key Environmental & Social Issues\_1

Aspect	Potential Impact / Risks
Displacement of People	<ul> <li>The road already exist, thus the potential displacement of people is not really issue</li> <li>However, some crops fields or cuca shops may be encroaching within the 60 meters road reserve (30 meters from the centreline)</li> </ul>
Sand / Gravel Mining	<ul> <li>Road construction require significant amounts of gravel</li> <li>The strategy is to re-use most of the old borrow pits and explore possibility of new borrow pits – if necessary</li> <li>Borrow pits presenst safety risk to people and livestock (e.g sand collapse on children playing in the borrow pits, drowning, animals getting stuck in the mud, etc)</li> <li>Borrow pits should be protected with a fence and Security</li> <li>Engineer's Geo-studies will provide a list of identified gravel pits</li> </ul>

# Key Environmental & Social Issues\_2

Aspect	Potential Impact / Risks
Water Source	<ul> <li>Road construction requires a lot of water</li> <li>A combination of water sources is being explored (earth dams, old boreholes that can be re-installed, Namwater)</li> <li>Important to ensure that identified water sources should not have negative impacts to the community (both in the short and long-term)</li> <li>Engineer's assessment will provide details of the identified water sources</li> </ul>
HIV / AIDS	<ul> <li>At construction stage, in-migration of people from other areas may expose young girls to unplanned pregnancies and associated health risks (e.g HIV/AIDS)</li> </ul>

### Way Forward

- Compile ESIA Report (Assessment and Findings)
- Develop the Environmental and Social Management
   Plan (ESMP) Action Plan
- Circulate the draft reports to stakeholders (Interested & Affected Parties I&APs)
- Incorporate stakeholder comments and develop the Comments and Response Report (CRR)
- Submit the application for Environmental Clearance Certificate (ECC) to the Environmental Commissioner

# **Questions / Comments**
