## AUSC Region 5 Games see heightened tennis competition

### Maurice Kambukwe

The African Union Sport Council Region 5 Games have been hailed by coaches as showcasing an exceptionally high level of tennis, marked by top-tier facilities and a strong roster of players.

Terrevy Schweitzer, head coach for team South Africa, praised Namibia's organisation of the event.

"It's a well-organised edition," she stated.

She noted that the facilities are "up to standards, which shows how serious the organisers were in putting these games together".

Schweitzer observed a noticeable increase in competition intensity compared to previous years.

"I think because this year's event, we have so many rated players taking part, which has caused the level of competition to go up," she said.

Kelebogile Momoyoo, Botswana's coach, echoed these sentiments.

Having coached at the previous event in Malawi, she expressed astonishment at the performance of the participating countries this year.

She said many top players based abroad have returned for these specific games.

"I am impressed with everything – from the courts, team performance and the level of tennis being showcased on court," Momoyoo said.

"I think it's a different ball game this year, as all countries have brought their top players, causing the level to go up," she added.

She, however, did offer a minor critique regarding the court's brightness.

"Had they had colours on the court, it would be great – unlike how it's plain and brighter. That is also causing a bit of a challenge," Momoyoo remarked.

She said: "Overall, I am happy with the games. So much is being learned from Namibia staging these games".

Zimbabwe's Linsent Chitoyi commented on the elevated competition, noting that players are more motivated and eager to win.

"I would say I am happy with the competition level. There is so much talent at the tournament from all countries, which I think is good for the region," she remarked.

She believes that the exposure to tougher opponents and the high standard of play will benefit athletes in future major competitions.
