Namibia

TO WHOM IT MAY CONCERN

Dear Sir/Madam,

RE: STAKEHOLDER NOTIFICATION FOR PROPOSED EXPLORATION ACTIVITIES OF BASE & RARE METALS, DIMENSION STONES, INDUSTRIAL MINERALS AND PRECIOUS METALS WITHIN THE EXCLUSIVE PROSPECTING LICENSE (EPL) NO. 9819 LOCATED SOUTHWEST OF OTAVI, OTJOZONDJUPA REGION.

Excel Dynamic Solutions (Pty) Ltd (EDS) hereby gives notice on behalf of Rockfield Minerals (Pty) Ltd (the Proponent) about the Environmental Impact Assessment (EIA) process for the proposed mineral exploration on Exclusive Prospecting License EPL No. 9819. The EPL covers an area of 2045.1839 hectares (ha), located about 40 km southwest of Otavi in the Otjozondjupa Region.

The EPL covers (overlies) Farms such as: **Fisher No.564, Lardner No.563, Hester No. 562, Embla No.561 and Tirol No.560 (Figure 2).**

The targeted commodities for the proposed exploration activities are **Base and Rare metals, Dimension Stones, Industrial Minerals and Precious Metals.**

The proposed exploration activities are listed in the Environmental Management Act No. 7 of 2007 and the EIA Regulations 30 of 2012 and cannot be undertaken without an Environmental Clearance Certificate (ECC). As such, an Environmental Scoping and Assessment (ESA) and Environmental Management Plan (EMP) Reports will be submitted to the Ministry of Industries, Mines and Energy (MIME) and the Ministry of Environment, Forestry and Tourism (MEFT) to support the application for decision-making

The Otavi Town Council has been identified as an Interested and Affected Party (I&AP) and would have the right to participate in the public consultation process and provide input on potential impacts of the proposed exploration activities.

Rockfield Minerals (Pty) Ltd intends to conduct exploration activities that entail the following:

- a) Lithology geochemical surveys which include soil and rock sampling shall be collected for trace element analysis to determine the presence of the targeted commodities.
- b) Electromagnetic and geophysical surveys shall be conducted should there be a need, following the designed exploration program.
- c) Detailed exploration drilling shall be conducted if the findings from the desktop study, lithology geochemical, electromagnetic and geophysical surveys are positive. These will entail drilling holes and sample collection for further analysis to determine the depth and spatial extent of the potential mineralization by using both Reverse Circulation (RC) and diamond drilling to about a 200 m depth.

If you have any comments, concerns, or inputs related to the proposed project, **please share them with us at the address below by the 09 September 2025.**
