RE: NOTICE TO INFORM AND SEEK SUPPORT FOR THE OPERATION OF AN EXISTING RECYCLING FACILITY IN KEETMANSHOOP, //KARAS REGION

Daniël Recycle Products of Namibia intends to conduct an Environmental Management Plan for the existing recycling facility. The company plays a critical role in waste management by recycling materials such as heavy and light steel, non-ferrous metals (including aluminium and copper), batteries, and plastics (including polyethylene terephthalate and plastic bags). The project is located at GPS coordinates: -26. 587511 S; 18.135191 E.

As the operation falls under a listed activity in terms of the Environmental Management Act, 2007 (Act No. 7 of 2007), Daniël Recycle Products has appointed Tortoise Environmental Consultants to conduct the required Environmental Management Plan (EMP) and facilitate the application for an Environmental Clearance Certificate (ECC).
This letter serves as a formal notice to keep you informed and to kindly request your support as an Interested and Affected Party (I&AP).

Thank you for your support in ensuring that this project contributes positively to both the community and the environment.

Yours sincerely,

Mr. Daniël Casparus du Toit
Daniël Recycle Products of Namibia
