To whom it may concern

I Andrew Nghiwete a headman of Onheleiwa village, ID 59041501088 , I'm here allocating the portion of the land to Power communication to erect the Tower network in the eastern part of our village , Our communities experience the difficult of the network in our village and surrounding villages due to the poor network and nowadays people using technology , mostly youth are moving from the villages to town for internet searching , which we found that we need to come up with a good initiative to erect a network tower in the village so that we can help our communities to communicate easily .

Our surrounding schools are more likely suffered a lot because learners are using the modern technology but find it difficult to go through when they are doing their subjects, therefore we found it necessary to make their life easy.

Land is available to erect a network tower in our village and we don't have any objection for this good development in our village.

I can be contacted at following numbers: 0811221280 or 0815485289
