Dear Sir/Madam

Re: Application for an Environmental Clearance Certificate for the Transport of Hazardous and General Cargo

Transworld Cargo (Pty) Ltd in a joint venture with BacktoBack Transport and Logistics Namibia (Pty) Ltd (the Proponent), undertakes the transportation of industrial, commercial, agricultural and project cargo across Namibia and throughout the Southern African Development Community (SADC). Cargo includes marine-grade oils, greases, lubricants, mining chemicals and reagents, industrial metals, explosives, concentrates, anodes and general palletised or containerised products. The Proponent's (or subcontractors) fleet of vehicles collects and delivers cargo from and to various warehouses in Namibia, including Transworld Cargo's own warehouses in Walvis Bay and Windhoek.

In order to ensure legal compliance, Geo Pollution Technologies (Pty) Ltd (GPT) was appointed by the Proponent, to apply for an environmental clearance certificate (ECC) for their transport operations. In line with the requirements of the Ministry of Environment, Forestry and Tourism (MEFT), an environmental management plan (EMP) and transport contingency plan (TCP) will be submitted to MEFT to support the ECC application. As part of the process, authorities are notified of the submission made to MEFT.

Should you require any additional information or wish to receive the EMP and/or TCP, please contact Geo Pollution Technologies at telephone 061-257411. Any comments on the application can be sent to Geo Pollution Technologies on [gpt@thenamib.com](mailto:gpt@thenamib.com) for subsequent submission to MEFT.

Sincerely,

Geo Pollution Technologies
