

Date 29 February 2026

The office of the Chief Executive Officer

Outapi Town Council

P. O. Box 853, Outapi, Namibia

Attention: Mr. Mateus Nashilongo

Dear Sir

Re: Consent for the Proposed Rehabilitation and Dualisation of Road Sections: MR92: 5km from the traffic light intersection towards Oshikuku, MR92: 5km from the traffic light intersection towards Ruacana, and MR123: 5km from the traffic light intersection towards Tsandi from Outapi Townlands in the Omusati Region (the Project)

As the headman of the **Okapuku Village**, where the section of MR92: Outapi-Oshikuku passes through our Village, and as per the community consultation meeting held on the 13th of November 2025, I hereby give consent and recommend that the project proceed.

In addition to that, on behalf of the community, I would like to request that the project be implemented for the benefit of society and for job opportunities during the construction (rehabilitation) phase, local community members should be prioritized for any semi-skilled and unskilled work.

Furthermore, if any borrow pit would be considered for establishment within our village, we kindly request that this be done in an environmentally and socially friendly and sustainable manner. The borrow pit(s) should be rehabilitated to a safe state once the material is depleted or activities are completed. Rehabilitation of the borrow pit should be done to ensure that it does not pose a threat to the people and livestock in the area in the long run. Therefore, in the case of a borrow pit on Okapuku Village, it will be important to notify me when operations at the pit have ceased so that we can forge a way forward regarding the pit. As per the community engagement in the meeting referred to above, meeting minutes and draft ESIA Scoping report prepared by the Environmental Consultants (and shared with us), the suggestions and matters discussed in the meeting should be considered throughout the project implementation.

Thank you for your cooperation.

Yours sincerely,

Mr. Simon Kandowa
