

STAKEHOLDER UPDATE FROM ECC: INTERNATIONAL FORESTRY CERTIFICATION INITIATIVE

Environmental Compliance Consultancy Pty Ltd (ECC), hereby wish to provide all stakeholders with an update on the Pyrogenic Capture and Storage Namibia (Pty) Ltd. (PyroNam) international forest standards certificate **(SA-FM/COC-001182)** and Environmental Clearance Certificate, in our ongoing efforts to promote sustainable forestry management. This initiative is rooted in our commitment to science-based evidence and the sustainable utilisation of our precious forestry resources.

This collaborative effort involves a dedicated group of farmers responsible for the harvesting and thinning of biomass across their range of land, known as Farm Management Units (FMUs). The goal is to support the restoration of rangelands, enhance productivity, and ensure environmental integrity.

Key Highlights of the Initiative:

- **Geographic Locations:** The farms involved are designated as Farm Management Units (FMUs). The specific geographic locations of these FMUs can be provided upon request.
- **Environmental Assessments and Monitoring:** Each FMU has undergone an Environmental Assessment to identify potential risks, mitigations, and any potential High Conservation Values (HCV). This process also involves engaging affected stakeholders, including neighbouring landowners and local communities, to ensure all interests are considered.
- **Post-Harvest Management:** In some cases, FMUs may choose to utilise aftercare measures to prevent bush encroachment. This may include the use of herbicides, controlled fire, or management of browsers. When herbicides are employed, ECC is committed to adhering to international best practices for storage, application, disposal, and monitoring, aligned with environmental and social management standards.
- **Risk and Safety Management:** Initial Environmental and Social Risk Assessments, stakeholder engagement processes, and Material Safety Data Sheets (MSDS) form the foundation of our operational guidelines, ensuring safety and environmental responsibility throughout the project.
- **Ecosystem Services:** ECC, on behalf of Jumbo Charcoal, has registered the ecosystem service ES1.5: Restoration of natural forest characteristics on these FMUs. This focuses on

rangeland restoration, improved carrying capacity, and better access on bush-encroached farms.

Further Information:

For more detailed information on this initiative and our environmental management practices, please follow the links below:

We appreciate your continued support as we work together towards sustainable forestry practices that benefit our environment, local communities, and future generations.

Thank you for your attention and cooperation.

Yours sincerely,

Subject: ECC-09-104 Notice of Public Review **Jumbo** Stakeholder Information Notification

Dear Stakeholders & Affected Parties,

We are pleased to inform you of an important development in our ongoing efforts to promote sustainable forestry management. We would like to share the latest developments on the **Jumbo** Charcoal Forest Standard Group Scheme.

This initiative represents a commitment to sustainable practices, and we have attached a detailed letter outlining all the relevant information.

Your ongoing support and active involvement in our efforts are instrumental, and we are eager to continue a collaborative journey toward greater environmental compliance and sustainability.

Should you have any questions or require additional information, please don't hesitate to reach out to us at info@eccenvironmental.com / 0816697608.

Your engagement is crucial, and we are grateful to have you as a valued partner.

Thank you once again for your support.

Kind Regards,

Emilia Haupindi
