BID _ EPL_No. 10385_ .pdf; Land Use Map.png;

Kala Minerals CC (The Proponent) proposes to undertake prospecting and exploration activities on Exclusive Prospecting License (EPL) No. 10385 located in Northwest of Usakos, in the Erongo Region, to prospect for Dimension Stones, Industrial Minerals, Precious Metals, Base and Rare Metals.

Mineral prospecting and exploration is one of the listed activities that cannot be undertaken without an Environmental Clearance Certificate (ECC) as per the 2012 Environmental Impact Assessment (EIA) Regulations of the Environmental Management Act No. 7 of 2007.

Furthermore, Sections 21 to 24 of the EIA Regulations require that Public Consultation is undertaken as one of the crucial components of the Environmental Assessment, which involves the pre-identification of potential Interested & Affected Parties (I&APs) or Stakeholders and ongoing registration of new I&APs and then subsequent consultation. You have therefore been identified as a potential I&AP for this proposed activity; therefore, you are receiving this communication.

Please find the attached Background Information Document (BID) and land use map for the proposed prospecting and exploration activities on EPL no. 10385. Kindly assist us by sharing the attached documents with other relevant stakeholders such as those from Tumib farm.

We are currently working on finalizing the date for the stakeholders' engagement meeting and the site visit (Environmental and archeological field assessments). We will provide further details once this information is available.

Thank you and kind regards

Milika Dineinge
