## 1. Purpose of the Report

Public participation is a process that is designed to enable all interested and affected parties (I&APs) to voice their opinion and/ or concerns which enables the practitioner to evaluate all aspects of the proposed development, with the objective of improving the project by maximizing its benefits while minimizing its adverse effects. I&APs include all interested stakeholders, technical specialists, and the various relevant organs of state who work together to produce better decisions. A comprehensive public participation process has been undertaken as part of the EIA process for the proposed 300 MW Liselo Solar Project and a table to summary of the issues that will be raised and responses in relation to these issues.
