CALL FOR PUBLIC PARTICIPATION COMMENTS

ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERIF 4585, WALVIS BAY, ERONGO REGION

Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and Environmental Management Plan (EMP) to obtain an Environmental Clearance Certificate as per the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 45876 of February 2012) to construct and operate a seawater desalination plant on Erif 4585, Walvis Bay, Erongo Region.

Name of proponent: Merlus Properties (Pty) Ltd

Project location and description:

The Merlus Group operates various seafood processing facilities, which include the Merlus, Abroma, Comorant and Seagull companies situated in Walvis Bay with factories located next to each other. It is intended to use Erif 4585, No. 96 Ben Amadhila Avenue, Walvis Bay for the construction and operation of a desalination plant. The Erif is located close to the other factories of the Merlus Group and large enough to accommodate the proposed facility. The Group currently use around 15 000 m³ of fresh water per month and consumption is expected to increase in the new future. Erif 4585 is located on the shore, with own jetties protruding into the ocean which means that raw seawater can be extracted from the sea for treatment to potable water quality using desalination by reverse osmosis (RO) treatment. The proposed facility will produce 2400 m³/day of permeate (final water) for 26 days per month, which will contribute ±10 400 m³ per month of potable water for the Merlus Group's activities. The plant will be positioned in an existing warehouse on the site, and the seawater will be abstracted from a point at one of the available jetties. The wastewater (brine) produced during the desalination as well as the backwash water for the cleaning of the system will be released back into the ocean.

Interested and affected parties are hereby invited to register in terms of the assessment process to give input, comments and opinions regarding the proposed project.

Public meeting will be held on 23 (Monday) February 2026 at 11h00 at the site.

The last date for comments and/or registration is 17 February 2026.

CALL FOR PUBLIC PARTICIPATION/ ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERF 4585, WALVIS BAY, ERONGO REGION

Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and Environmental Management Plan (EMP) for the proposed desalination plant on Erf 4585, Walvis Bay, Erongo Region.

Project location and description: The Merlo Group operates various seafood processing facilities, which include the Merlo, Abrama, Constant and Sagul companies situated in Walvis Bay with factories located next to each other. It is intended to use Erf 4585, No. 86 Ben Amadiela Avenue, Walvis Bay, Erongo Region, to construct and operate a desalination plant. The Erf 4585 is located on the shore with open waters protruding into the ocean which means that raw seawater can be extracted from the sea for treatment to potable water quality using desalination by reverse osmosis (RO) treatment. The proposed facility will produce 400 m³ of permeate (final water) for 26 days per month, which will contribute to 10400 m³ per month of potable water for the Merlo Group's activities. The plant will be positioned in an existing warehouse on the site and the seawater will be abstracted from a point at one of the available jetties. The wastewater (brine) produced during the desalination as well as the backwash water for the cleaning of the system will be released back into the ocean. Interested and affected parties are hereby invited to register in the assessment process to give input, comments, and opinions regarding the proposed project. A public meeting will be held on 23 (Monday) February 2024 at 11:00 AM at the site. The last date for comments and/or registration is 17 February 2024. Contact details for registration and further information: Green Earth Environmental Consultants Contact Person: Clarie De Toir Carlen Tel: +264 (0) 81 220 584 Email: carlen@greenearthnamibia.com

Green Earth Environmental

CALL FOR PUBLIC PARTICIPATION/ COMMENT

ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERF 4888, WALVIS BAY, ERON GO

Green Earth Environmental Consultants have been appointed to attend to and complete the Environmental Impact Assessment and Environmental Management Plan (EMP) to obtain an Environmental Clearance Certificate as per the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 4878 of 6 February 2012) to construct and operate a seawater desalination plant on Erf 4888, Walvis Bay, Erongo Region.

The Main Group operates various seafood processing facilities, which include the Merula, Abramo, Comstant and Constant facilities situated in Walvis Bay with factories located next to each other. It is intended to use Erf 4888, No. 84 Be Anneliese Avenue, Walvis Bay for the construction and operation of a desalination plant. The land is located close to the other factories of the Merula Group and large enough to accommodate the proposed plant. The Group currently use an IS O0001:2015 water treatment and consumption is expected to increase in the next few years. The desalination plant, without jetties providing the ocean which means that the raw seawater can be treated by reverse osmosis (RO) treatment. The proposed facility will produce 400 m³ day of permeate final water for 26 days per month which will contribute to 10 400 per month of potable water for the Merula Group activities. The plant will be positioned near existing water treatment plant. The seawater (brine) produced during the desalination process will be used for the cleaning of the system will be released back into the ocean.

Interested and affected parties are hereby invited to register in terms of the process to provide comments, and opinions regarding the proposed project. A public meeting will be held on 22 (Monday) February 2026 at 11:00 at the site.

The last date for comments and/or registrations is 17 February 2026.

ENVIRONMENTAL IMPACT ASSESSMENT TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A DESALINATION PLANT ON ERF 4585, WALVIS BAY, ERONGO REGION

Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and Environmental Management Plan (EMP) to obtain an Environmental Clearance Certificate as per the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 4878 of 6 February 2012) to construct and operate a seawater desalination plant on Erf 4585, Walvis Bay, Erongo Region.

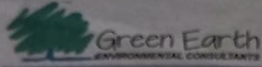

Name of proponent: Merlus Properties (Pty) Ltd

Project location and description: The Merlus Group operates various seafood processing facilities, which include the Merlus, Abroma, Comoran and Seagull companies situated in Walvis Bay with factories located next to each other. It is intended to use Erf 4585, No. 86 Ben Amadhila Avenue, Walvis Bay for the construction and operation of a desalination plant. The Erf is located close to the other factories of the Merlus Group and large enough to accommodate the proposed facility. The Group currently uses around 15 000 m³ of fresh water per month and consumption is expected to increase in the new future. Erf 4585 is located on the shore, with own jetty protruding into the ocean which means that raw seawater can be extracted from the sea for treatment to potable water quality using desalination by reverse osmosis (RO) treatment. The proposed facility will produce ~400 m³/day of permeate (final water) for 26 days per month, which will contribute ±10 400 m³ per month of potable water for the Merlus Group's activities. The plant will be positioned in an existing warehouse on the site, and the seawater will be abstracted from a point at one of the available jetties. The wastewater (brine) produced during the desalination as well as the backwash water for the cleaning of the system will be released back into the ocean.

Interested and affected parties are hereby invited to register in terms of the assessment process to give input, comments, and opinions regarding the proposed project. A public meeting will be held on 23 (Monday) February 2026 at 11h00 at this site. The last date for comments and/or registration is 17 February 2026.
