Airbus Identifies Key Unserved Routes in Africa

Eileen van der Schyff

At the AviaDev conference in Windhoek on 21 June, Airbus revealed a new report identifying important unserved routes in Africa. The report highlights cities like Lagos, Cape Town, Nairobi, Dakar, and Douala as having significant potential for new direct flights.

Airbus believes that opening these routes could improve travel connections, boost local economies, and increase airline revenues. Geert Lemaire, Airbus' Market Intelligence and Consulting Director noted that issues like restrictive air service agreements and economic challenges currently prevent these routes from being served. Lemaire emphasised

Airbus' commitment to working with African airlines to find the best fleet solutions to help grow the continent's air travel industry. According to Airbus' Global Market Forecast, air traffic in Africa is expected to grow by 4.1% annually over the next 20 years, creating a need for 1,180 new aircraft by 2043. This growth is also predicted

to contribute to a 3.3% increase in Africa's GDP, higher than the global average. To support this growth, Airbus estimates that Africa will need 15 000 more pilots, 20 000 technicians, and 24 000 cabin crew members. For more details, readers can access Airbus' full analysis on unserved routes.
