Dear Sir

Re: Consent for the Construction of a Gravel Access Road (6km) from lipanda-YaAmiti Settlement (Village) to Andreas Amushila Primary School (PS) in the Omusati Region

As the headman of **Enkombo Village**, I hereby give consent for the Construction of a Gravel Access Road (6km) from lipanda YaAmiti Settlement to Andreas Amushila Primary School (PS) (situated in Enkombo Village) as per the stakeholder consultation meeting held on the 19th of February 2026 in Outapi and the community consultation meeting held 04th of March 2026 in lipanda YaAmiti and Enkombo Villages.

In addition to the above, on behalf of the community, I would like to request that the utilization of the borrow pit(s) in the area be done in an environmentally and socially friendly and sustainable manner, and this includes proper rehabilitation of the borrow pit to a safe state, once the material is depleted or activities are completed. Rehabilitation of the borrow pit should be done to ensure that it does not pose a threat to the people and livestock in the area, even after road construction works are completed. It will therefore be important to notify me when operations at the borrow pit have ceased so that we can forge a way forward regarding the pit, which would entail the Construction Contractor either rehabilitating the borrow pit by backfilling and or levelling to safe conditions, or so that it can act as a rainwater holding dam for the community livestock.

Thank you for your cooperation.

Yours sincerely,

ANDREAS N.
