FOR ATTENTION: MS S ANGULA

APPLICATION FOR THE ENVIRONMENTAL CLEARANCE CERTIFICATE RENEWAL FOR THE CONTINUATION OF THE BERSEBA BULK WATER SUPPLY SCHEME, KARAS REGION.

Dear MS ANGULA,

NamWater is in the process of applying for a renewal for an Environmental Clearance Certificate issued 19 July 2022, and as part of the application process, NamWater was requested to submit proof of written notice to the local authority council, regional council and traditional authority, in which the site or alternative site is situated and consent obtained. However, the Berseba Water Supply Scheme is an existing scheme, and the land on which the elevated reservoir is located is owned by NamWater.

The scheme comprises the following infrastructure:

- Two production boreholes
- A 160 mm diameter, 1,380 m long Class 4 uPVC pipeline
- An elevated Braithwaite steel reservoir with a storage capacity of 150 m³

Given that the scheme is already established and operational, with existing infrastructure in place, the requirement from the Village Council (Local Authority) is not applicable in this instance.

For more information, please contact Mr. F Aupokolo at cell number 081 325 3301 or via e-mail (Aupokolof@namwater.com.na).

Sincerely,
Jolanda Kamburona
Acting Manager: Environmental Services
