

# **SCREENING QUESTIONNAIRE FOR PROJECTS**

**MINISTRY OF ENVIRONMENT & TOURISM  
DIRECTORATE OF ENVIRONMENTAL AFFAIRS**

The completion of this questionnaire is a requirement under section 20 (1) of the Environmental Management Act

## PURPOSE OF THIS QUESTIONNAIRE

The information you provide in this questionnaire will provide the Government to gain a clear understanding of your proposed project.

Projects that are likely to have a significant impact on the environment may not go ahead unless an Environmental Assessment (EA) has been done first, and only if EA can demonstrate that it is possible and feasible to keep impacts to acceptable levels.

Nearly all projects have some impact, but some projects are so small and impacts so low, that it may not be necessary to do a full EA. On the other hand, some projects could have serious environmental impacts, and it is essential that we identify these before the projects are implemented. If an EA is not done, we may only discover the impacts after the project implementation. By then, it is usually too late to avoid the impacts. If this happens the developer might have to spend a lot of money fixing the problem or even abandon the project altogether.

The information you provide in this questionnaire can help us to make the right decision of whether an EA should be done or not, the level of detail of the EA, the main issues which should be investigated, and so on. This guides all of us in our future planning and could save money and time in the long run.

The developer must complete this questionnaire accurately, honestly and comprehensively. The Environmental Commissioner and the relevant ministry will jointly decide on whether the EA is necessary or not. Their decision based on whether the project is likely to have significant effect on the environment by virtue of its nature, size or location.

Your cooperation is essential
